Challenges in Implementing International Evidence-Based Practices in Asian Healthcare Settings: A JBI gLOCAL Solution Room

[REGISTER HERE](#)

PROGRAM

JUNE 25, 15:00 – 17:00 (UTC+7)

JUNE 25, 17:00 – 19:00 (UTC +9)

Global Evidence, Local Decisions

The JBI gLOCAL Solution Room is an event held across the globe from 23-27 June 2025, in numerous different countries and is designed to provide pragmatic solutions to your challenges in getting evidence into practice in your clinical setting.

Each JBI gLOCAL Solution Room event will include a panel of experts that will give you 'real-world' insights during their presentations focused on evidence-implementation. As a 'think tank' they will then respond directly to participant questions around EBP challenges in an interactive panel discussion. The aim is to provide practical solutions for getting evidence into practice in your clinical setting.

Who should attend?

The JBI gLOCAL Solution Room aims to bring together clinicians, academics and policy makers interested in evidence-based healthcare and serve as a synchronized, collaborative, and widely accessible inter-regional space to promote evidence-based practice discussion and debate. Attendance to all events worldwide is free of charge.

Learn more about 'GLOCALization' and JBI's approach to global evidence-based healthcare at jbi.global/jbisolutionroom

Session 1	Welcome

Assist. Prof. Dr. Porawan Witwanukool is the director of JBI-MURSON, Thailand, and a nursing lecturer in the adult and gerontological nursing division at the Ramathibodi School of Nursing, Faculty of Medicine, Ramathibodi Hospital, Mahidol University. She is an expert in quantitative research, systematic reviews, cancer support, nursing education, and intervention design. Her expertise is demonstrated through her work in symptom management for individuals with cancer and her significant contributions to gynecological nursing.

Ratanaporn Jerawatana is an Advanced Practice Nurse (APN) in the Nursing Service Division, Faculty of Medicine, Ramathibodi Hospital, Mahidol University, Thailand. She specializes in diabetes care and has extensive experience in enhancing the quality of care for all types of diabetes patients. Her work includes the development of DSMES programs and CNPG for diabetes. In addition to her role as an educator and researcher in diabetes nursing, she is also an executive committee member of national organizations, such as the Thai Association of Diabetes Educators, the Diabetes Association of Thailand, and the Ministry of Public Health of Thailand. As a representative of the nursing profession, she plays a key role in developing and standardizing diabetes care systems in Thailand.

Dr. Ratchanok Phonyiam is a nursing instructor in the Department of Community Health Nursing at Ramathibodi School of Nursing, Mahidol University, Thailand. Her research interests include lifestyle modification, social determinants of health, health disparities, community health nursing, and women's health. She focuses on type 2 diabetes mellitus across the lifespan, from childhood through pregnancy, postpartum, and adulthood. She conducts systematic reviews and meta-analyses on school-based interventions to prevent type 2 diabetes in children and adolescents. Additionally, she is conducting a qualitative study to explore healthcare providers' perspectives on managing diabetes during pregnancy, with the goal of identifying knowledge gaps and developing evidence-based implementation strategies.
